DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Thursday, 08 June 2023 at 05:53 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Levels of air pollution are expected to be Low today although a few pockets of Moderate levels may develop in the southwest of England, due to the warm and sunny conditions.

Tomorrow: Similar conditions on Friday, with air pollution levels remaining generally Low with a few pockets of Moderate levels in the southwest of England and perhaps south Wales.

Outlook: Remaining dry, warm and largely sunny initially, causing air polllution levels to worsen and become increasingly Moderate across large parts of the UK over the weekend. However some showers are expected to develop Saturday night and Sunday, somewhat reducing the chance of seeing widespread Moderate levels from Sunday.
